DETAILED ACTION

There are several claim issues that are noted in this application which affect the restriction/election given below. Examiner notes that claim 15 (and possibly claim 20) appear to be incorrectly dependant. Claim 15 deals with a scheduling system, and the claim on which it is currently dependant, claim 1, contains no such scheduling system. The dependant claim 14, which immediately precedes claim 15, deals with scheduling and leads the examiner to believe that the claim ordering should have resulted in claims 15 and 20 being dependant upon claim 14. This is how the restriction below is written. If this is not correct, applicant is asked to note this in the response and to indicate which claims they feel belong in the correct groupings indicated below.

Election/Restrictions

- I. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, 21-38, 49 and 50, drawn to a decision making process after manufacturing data is input, classified in class 700, subclass 95.
 - II. Claims 14-20, drawn to the creation of a schedule for manufacturing, classified in class 700, subclass 100.
 - III. Claims 39-46, drawn to data processing involving printing colors, classified in class 101, subclass 115.
 - IV. Claims 47 and 48, drawn to supply and demand forecasting, classified in class 705, subclass 10.

Art Unit: 2125

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has a separate utility such as generic demand forecasting for manufacturing or decision making ability in any manufacturing system.

See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, restriction for examination purposes as indicated is proper. Also, because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Rick James on September 21, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
